

CLEAN, DEODORIZE, SEAL

Step 1 - Clean:

- **RECON Heavy Duty Cleaner (3027) or Recon Extreme Duty Cleaner (3024)** - Flexible concentrates that neutralize acidic residues while cleaning. Ideal for emulsifying stubborn adhered particulate and films.
- **RECON Citrus Solvent Cleaner (3022)** - Ideal for sticky and oily resinous deposits from plastic & polymer combustion.

Step 2 - Deodorize:

- **RECON Extreme Duty Odor Counteractant (3041)** - A powerful multi-purpose odor counteractant that is effective as a "pulldown" for airborne particulate, chemically neutralizes the source of malodors, and imparts a pleasant, fresh linen fragrance.

Step 3 - Seal:

- **RECON Smoke Odor Sealer (3090-White, 3091-Clear)** - After cleaning and deodorization, Smoke Odor Sealer provides a barrier and long term protection against future release of fire related odor. Its water-based formulation performs without the cleanup and combustibility concerns of oil or alcohol-based sealers.
