

Water Damage and Mold Remediation Products:

The leading professional line of water damage and mold remediation products, Fiberlock's disinfectants and coatings have been used extensively during past catastrophes including Hurricane Katrina, the Midwest floods, Nashville, Tennessee, and most recently Hurricane Irene and Tropical Storm Lee.

These products have been formulated, tested and proven to be effective in the real world situations faced during the most extreme cleanups. [More>>](#)

AfterShock Fungicidal Coating

AfterShock is an EPA-registered antimicrobial coating designed to kill residual mold and mildew remaining after pre-cleaning contaminated surfaces.

AfterShock also inhibits the future growth and spread of mold and mildew on the cured coating film in residential and institutional buildings. This extremely durable, easy to apply, 100% acrylic sealant provides excellent fungicidal characteristics to address mold growth from water damage. AfterShock is recommended for use on interior wall surfaces such as plaster, wallboard, drywall, concrete, masonry block, wood, primed metal and galvanized metal. [More>>](#)

Advanced Peroxide Cleaner Removes Mold & Mildew Stains on Porous and Non-Porous Surfaces

The leader in advanced cleaners and coatings, Fiberlock Technologies has introduced a revolutionary new hydrogen peroxide based cleaner. Advanced Peroxide Cleaner is created using innovative chemistry and a unique manufacturing process.

The proprietary formulation releases the maximum oxidation potential of Fiberlock's Advanced Peroxide Cleaner. This allows for a lower concentration product that is Green Focus Certified, safer to use, not DOT regulated and breaks down to water and oxygen. The end result is a product that provides performance unmatched by any other product. [More>>](#)

Fiberlock is positioned and committed to support those affected by Hurricane Sandy

Fiberlock team members are in the area and available to assist you and your customers. If you have any customers in the area that you would like us to contact, please provide us with names, locations and phone numbers/email addresses.

Production of our disinfectants/sanitizers and protective coatings have been increased and additional product is in transit to the area. Product is currently available at all Fiberlock distributors in the area. [Click here for local distributors.](#)

Fiberlock Technologies is ready to serve you. Please call 800.342.3755 with any requests or for the latest information regarding product and team members in the affected area.

For more information on Fiberlock, our products, and distributors visit us at www.fiberlock.com.

ShockWave RTU - The ideal disinfectant & sanitizer for disaster cleanup

ShockWave RTU is EPA-registered for the types of cleanup that are associated with recovery from major weather events like hurricanes and flooding. Major disaster restoration contractors nationwide have made ShockWave the industry leading brand when it comes to reconstruction and restoration after a storm.

ShockWave satisfies the recommendations and requirements set forth by the Federal Emergency Management Agency in their special Hurricane Katrina Recovery Advisory 11/05 that was specifically intended to provide guidance for buildings subjected to the effects of long-term flooding and mold growth following a hurricane.

- Over 120 organism kill claims
- EPA Registered for water damage & black water cleanup.
- Disinfects hard, nonporous surfaces.
- Sanitizes porous and semi-porous surfaces.
- Perfect for situations when a clean water source is not available.
- Hospital grade EPA-registered disinfectant, sanitizer, fungicide, virucide, bactericide and cleaner.
